Labour Market Statistics and Analysis

Building technical and institutional capacity to collect and analyse information on the labour market, establish a labour market profile and monitor labour market conditions. This involves the use of statistical concepts and techniques, in order to address persisting labour market challenges such as high unemployment or low employment and participation rates, skill imbalances, and poor working conditions. Gaps in gathering high-quality statistical data and analytical capacity need to be identified and addressed through training and development initiatives, and the use of international labour market indicators and best practices. The programme offers courses to train the components required to address these challenges.

Courses are offered on:
- Introduction to labour statistics and labour market indicators and information systems
- Business surveys and micro data surveys
- Labour market and economic data analysis
- Econometrics for labour market analysis
- Market indicators and labour marketunefficiency

Academy on Labour Market Statistics and Analysis

The academy aims to improve national survey for better and more use of statistical data and indicators. It provides advanced training in the use of national labour market statistics and indicators, established a labour market profile and monitor labour market conditions.

Employment and Labour Market Policies

According to the International Labour Office, the world faces the challenge of creating 600 million productive jobs over the next decade in order to generate sustainable growth and maintain social cohesion. At the national level, a coherent, integrated and sustainable approach to employment and labour market policies is critical. It involves a blend of macroeconomic and microeconomic dimensions: incomes and employment, skill formation and labour mobility, income distribution, and the functioning of labour markets. In the context of today’s pressures such as high unemployment and under-employment, the labour market continues to face major challenges regarding the quality of available work for young workers.

Courses are offered on:
- Introduction to labour market policies
- Local labour market policies
- Investments in sustainable development
- Labour market policies and social dialogue
- New roles of employment policies

Employment Policy Course:

Introduction to labour market policies and indicators
Introduction to the principles of effective employment policy
Introduction to new concepts, dimensions and indicators
Introduction to labour market policies and institutions
Introduction to the principles of effective employment policy

The course is designed to forge a comprehensive understanding of the withdrawal undertaking a coherent and integrated approach to employment and labour market policies. It involves a blend of macroeconomic and microeconomic dimensions: incomes and employment, skill formation and labour mobility, income distribution, and the functioning of labour markets.

Youth Employment

The prolonged economic crisis has affected the labour market situation of youth, in the extent that many of them are going on the job search. Youth unemployment has contributed to rising globally and is an open challenge in most regions, influencing countries and individuals across the world. It has increased the vulnerability of young people, threatening their social and economic integration. In response to the crisis, most parties have taken steps to decentralize and make the policy process more transparent and effective. The programme offers courses to train in order to address these challenges.

Courses are offered on:
- Policies for youth employment
- Skills training and youth employability
- Employment-intensive investment for sustainable development
- New roles of employment policies
- Employment policies and social dialogue
- European Union youth employment programmes

International Course on Decent Work for Youth:

Introduction to informal economy concepts and strategies (a self-learning module)
Introduction to decent work concepts and strategies
Monitoring and evaluation of youth employment programmes
Transition to work: Reaching disadvantaged youth
Economic policies for youth employment
Skills training and youth employability
Programmes

The course is designed to forge a comprehensive understanding of the withdrawal undertaking a coherent and integrated approach to employment and labour market policies. It involves a blend of macroeconomic and microeconomic dimensions: incomes and employment, skill formation and labour mobility, income distribution, and the functioning of labour markets.

Skills Development

Sound national skills development policies and a good quality technical and vocational education and training (TVET) provision are key factors in the employability of workers and the sustainability of employment. Skills development systems must also help workers and companies to adapt to changes in the economy. They help to ensure that the workforce has the skills that are demanded by employers. TVET gives special attention to disadvantaged groups and workers in geographically remote areas or who have limited access to education and training. It gives special attention to disadvantaged groups and workers in geographically remote areas or who have limited access to education and training. It addresses national and local priorities.

Courses are offered on:
- Skills development
- Skills training and youth employability
- National skills development programmes
- Employment policies and social dialogue
- International Course on Decent Work for Youth
- New roles of employment policies

- New roles of employment policies

Training tools and techniques

The programme offers courses to train in order to address these challenges. It aims at equipping participants with the necessary knowledge and skills to design, implement and evaluate effective, sustainable and inclusive skills development policies and programmes.

Courses are offered on:
- Skills development
- Skills training and youth employability
- Employment policies and social dialogue
- International Course on Decent Work for Youth
- New roles of employment policies

The course is designed to forge a comprehensive understanding of the withdrawal undertaking a coherent and integrated approach to employment and labour market policies. It involves a blend of macroeconomic and microeconomic dimensions: incomes and employment, skill formation and labour mobility, income distribution, and the functioning of labour markets.
Learning with the EPAP

The EPAP handles a range of activities including master’s programmes, training courses, knowledge-sharing events, experts meetings and conferences. Depending on their specific nature, activities are intended for:

- University graduates
- Researchers, statisticians, analysts
- Policy makers
- Implementers
- Staff of donor and development agencies (including ILO staff)

Training courses can be open or tailored to the specific needs of partners and client institutions. They take place at the international, regional or national level, and have varying duration. Course delivery modalities include:

- Face-to-face (residential): generally 1 to 2 weeks courses
- Distance learning: programmes lasting 1 to 4 months
- Blended: combine the previous two modalities

Main working languages: English, French and Spanish, but courses are also offered in Arabic, Portuguese, Russian, and Chinese with interpretation.

The ILO Turin Centre’s facilities

Located in an attractive park on the banks of the River Po, the Centre’s campus provides a congenial environment in which to live and study.

- Contains 21 pavilions with fully equipped modern classrooms, conference halls and meeting rooms fitted out for multilingual simultaneous interpretation, a computer laboratory, and a computerized documentation centre linked to various data banks.
- The campus has 287 study/bedrooms, all with private bathrooms, telephones and cable television. It also has:
  - a reception desk open 24 hours a day;
  - a restaurant, a self-service canteen and a coffee lounge, all catering for international dietary needs;
  - a bank;
  - a travel agency;
  - a laundry service;
  - a post office;
  - an internet point;
  - a recreation room;
  - facilities for outdoor and indoor sports;
  - an infirmary.

Social events are regularly held both on and off campus, so that participants from different cultural backgrounds can make the most of the stimulating international climate.

All activities meet the following three criteria, which form part of the ‘Turin Learning Approach’:

- Relevance: making sure that the Centre’s activities are customer-oriented, that they respond to the current needs of individuals, and that they contribute to organizational development agendas.
- Quality: high quality services guarantee the Centre’s competitive edge. The Centre offers value-based learning opportunities built on innovative methods and industry standards.
- Impact: making a difference. The Centre constantly monitors the results of its training in terms of learning and change by individuals and organizations.

An evaluation is made at the end of each event of the quality of course materials and contents, and of the achievement of learning objectives. A further evaluation is made after the course, to assess the application of learning in the workplace and its impact at organizational level.
