

The ILO Turin Centre's facilities

Located in an attractive park on the banks of the River Po, the Centre's campus provides a congenial environment in which to live and study.

- It contains 21 pavilions with fully equipped modern classrooms, conference halls and meeting rooms fitted out for multilingual simultaneous interpretation, and a computerized documentation centre linked to various data banks.

The campus has 287 study/bedrooms, all with private bathroom, telephone, free access to internet and cable television. It also has:

- a reception desk open 24 hours a day;

- a restaurant, a self-service canteen and a coffee lounge, all catering for international dietary needs;
- a bank;
- a travel agency;
- a laundry service;
- a post office;
- an internet point;
- a recreation room;
- facilities for outdoor and indoor sports;
- medical service.

Social events are regularly held both on and off campus, so that participants from different cultural backgrounds can make the most of a stimulating international environment.

Public-Private Partnership Policies: Legal framework and competition requirements

Introduction

Public Private Partnerships (PPPs) are complex forms of outsourcing contracts which are increasingly used to bridge the gap between national aspirations to modernise and upgrade essential public infrastructure & public services and the ability of governments to undertake such improvements with own resources (funds and personnel). The planning, award and supervision of these complex contractual and financial schemes require more advanced skills than those typically needed for the traditional project and procurement management operations. Therefore PPPs tend to expose more vividly the competency-gaps at the level of the national public procurement teams involved. Furthermore, while PPPs have intrinsic advantages in encouraging cost-saving innovation and improving risk management, these benefits will be only realised where the public sector has the appropriate legal framework and the necessary staff competencies to select, appraise and manage such procurement successfully.

Overall objective

This ILO/Turin course aims to contribute towards optimisation of the economic and social benefits of PPP schemes, in developing and transition countries, through exploring internationally-accepted models of the governing policy/legal framework of PPP as well as the techniques used in the prioritisation, selection, competition and management aspects of PPPs.

Specific objectives

By the end of the workshop participants will have acquired the essential knowledge and skills for effective selection and award of PPP complex outsourcing procurement, together with a deeper awareness of the social, economic and environmental parameters that form part of the broader national policy agenda. In particular the participants will be better prepared to deal with:

- Planning and selection of PPP priority projects as per national policy and the competition requirements ;
- designing bankable and effective contractual structures;
- encouraging cost-saving innovations;
- ensuring objective output specifications in both tender documents and contracts;
- optimising risk allocation between the public and the private sector;
- tender evaluation and option analysis techniques;
- managing projects and programmes to optimise “value for money”;

Participants will be introduced to model legislative provisions, documentation and “best practice” techniques from developed and transition countries, as well as emerging markets. Emphasis will be placed on customizing not cloning these models in order to better meet the specific requirements of the participant’s projects. The participants will also be made conscious of the importance of putting in place well integrated inter-disciplinary teams, as an essential precondition for success in PPP initiatives in both the public and private sectors. Participants’ profile The course is designed for government and International Financial Institutions (IFI) officials involved in the conceptualization,

appraisal and implementation of PPP schemes. The course is also suitable for participants from consultancy firms, civil society organisations and procurement policy makers. Candidates are expected to have basic knowledge of procurement and project management practice in the public or private sector. A sound knowledge of technical English is a must.

Methodology

The course is delivered by a team of senior legal experts and PPP practitioners. The course uses a highly participative delivery methodology, combining interactive subject-matter presentations with plenary discussions and case studies designed to consolidate lessons’ learnt from the experience of selected countries who pioneered PPP schemes.

When introducing the key ingredients for success in PPP schemes, case studies will be used to transfer knowledge and skills gained from practical experience. In particular the case studies will provide insight into the nature of required relationships among the various parties that are critical for achieving optimal results.

Equally important is the brainstorming approach needed to develop well-conceived PPPs that could serve wider economic, social/ political and environmental aims.

Content

The following topics will be covered:

- UNCITRAL Model Legislative Provisions on Privately Financed Infrastructure Projects
- PPP and Services Concessions under EU Law

- Planning and procuring PPP
- Risk management and achieving Value for Money in PPP
- PPP case studies
- Financing aspects of Public Private Partnerships (the role of commercial/ investment bankers)
- Study visit to a successful PPP project in north Italy.

Cost of participation

The cost of participation in this one-week programme is **Euro 2,530** payable in advance by the participant’s sponsoring organisation. This covers:

- **tuition fee**, which includes the use of the Centre’s training facilities and associated support services, books and training materials, routine medical care and insurance;
- **participant fee**, which covers:
 - accommodation and full-board at the Centre.

Main travel between the participant’s home country and Turin is not included.
