APPLICATION DEADLINE

6 APRIL 2026

OVERVIEW

This course is part of the **AI-Augmented and Responsible practice in Skills Development** pathway: a selected set of courses designed to strengthen the competencies of TVET actors, enabling them to design, deliver, and engage confidently and responsibly in AI-augmented education and training systems.

Artificial Intelligence (AI) is reshaping how work is organised, how skills are defined, and how training systems prepare learners for employment. Across occupational sectors and technical occupations, tasks are being automated, augmented, or newly created, requiring education and training systems to respond rapidly and strategically.

This course is designed to help TVET institutions, educators, and skills policymakers understand these transformations and translate them into practical, ethical, and sustainable training solutions.

Delivered fully online over four weeks, the course equips participants with concrete frameworks to integrate AI into TVET.

WHAT

The course is structured into four modules:

- **Module 1 – AI in Occupational Sectors**
- **Module 2 – Redesigning TVET Curriculum for AI-Augmented Learning**
- **Module 3 – Preparing Students for AI Workplaces**
- **Module 4 – Instructor Upskilling & Sustainable AI Integration**

WHAT WILL I LEARN?

- Analyze how AI reshapes tasks and skills across multiple occupational sectors
- Redesign curricula to integrate AI in pedagogically sound ways
- Apply role-based AI literacy and ethical frameworks in training
- Prepare learners for safe, responsible, AI-augmented workplaces
- Plan instructor upskilling and institutional AI integration strategies

WHO

This course is designed for:

- TVET trainers, instructors, and curriculum developers
- Skills-development policymakers and programme managers
- TVET institution leaders and training managers
- Enterprise training and workforce-development professionals
- Practitioners involved in digital and AI transformation of skills systems

WHY

WHY SHOULD I REGISTER?

After completing this course, you will be able to apply a clear conceptual framework to manage vocational training centers more effectively, align training provision with labour market needs, and make informed management decisions through collaboration with experts and peers. You will also strengthen your capacity to operate within AI-augmented education and training systems as part of the **AI-Augmented and Responsible Practice in Skills Development pathway**.

COURSE STRUCTURE & METHODOLOGY

The programme is delivered fully online and requires approximately 60 learning hours. It includes:

- Pre-course learning: Self-paced modules, forums, and quizzes
- Live learning: Interactive webinars and peer exchange sessions
- End-of-course assignment: A strategic improvement plan

CERTIFICATE

Participants who complete at least 90% of the course activities and the mandatory assignment will receive a **Certificate of Achievement** and the **AI-Augmented Skills Development digital badge**, recognizing the AI competencies acquired during the course.

HOW TO APPLY

Register online by clicking the "APPLY NOW" button on this page:

<https://www.itcilo.org/courses/skills-development-age-ai>

Applications must be submitted **no later than 6 April 2026**.

Selection criteria include:

- Relevant professional experience
- Sponsorship letter covering the course fees

A limited number of fellowships is available, with priority given to: Women, Persons with disabilities, Applicants who have not previously received ITCILO funding.

PRICE

Total: **€1,125**
